Continuation Sheet No. 1

structure; while a newer asphalt shingle clad shed roof lean to, runs the full depth of the structure on the eastern side. The entire exterior walls of the structure are clad in painted aluminum siding. The main entrance (north) to the store is accessible from an asphalt shingle canopy over a stone porch along the entire north end, and stone steps from street level. A deteriorated concrete walkway on the west side leads to a wooden porch, covered with a slate clad roof and pre-finished aluminum ceiling. Both north and west porches have wood railings with unfinished surfaces. A brick chimney extends through the upper gable roof on the west side. A corroded standing seam metal canopy roof (supported by metal columns) over a concrete porch with metal railings, was observed on the east side.

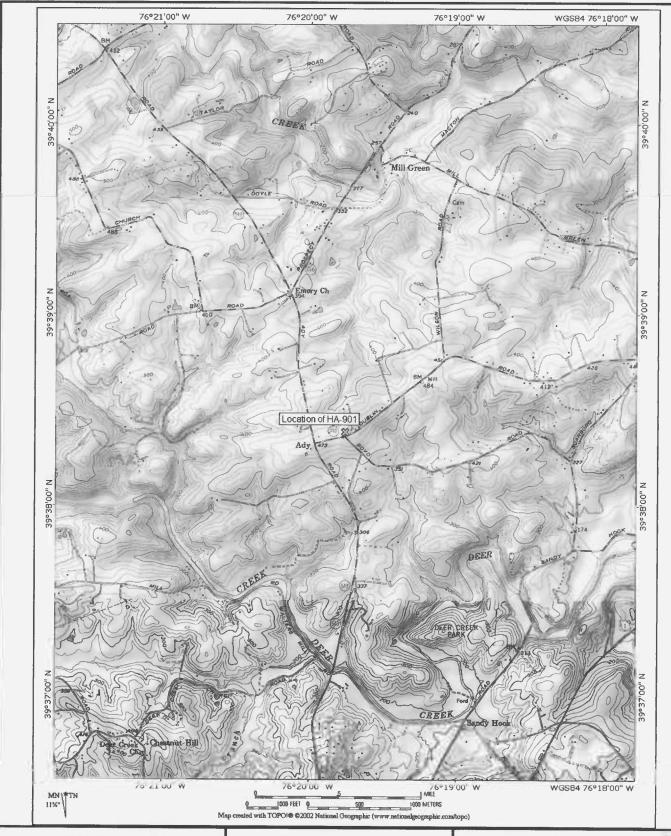

The more recent shed-type lean to on the east side was observed with single-hung vinyl windows, and pre-finished perforated aluminum roof soffits. The older gabled portions were observed with single hung wood windows (in need of replacement) and metal storm windows. With the exception of the painted aluminum siding, which was observed to be in fair condition, all exterior wood members appeared deteriorated with peeling paint. The roof claddings appeared to be in fair to poor condition.

The integrity of the property has been lost, owing to the introduction of modern siding and windows. The quality of its original design does not appear to have been significant enough in the first place to qualify the property for eligibility under Criterion C: Design/Construction, nor is it known to be associated with any event, person, or archaeological significance that would qualify it for eligibility under Criteria A, B, or D, respectively.
